

AS Norma is the manufacturer of car safety systems and their components by applying the processes of metal processing, plastic casting, galvanic coating and assembly. AS Norma is located at Tallinn, Laki 14.

AS Norma is a category B major accident risk company considering the amount of tempering salts and oxidizing properties used in the hardening process and the hazardous chemicals used in the coating process. All documentation required under the Chemicals Act of the Republic of Estonia has been submitted and AS Norma holds a corresponding license L.KKL.HA-230904.

The impact of chemicals on workers and environment used in the heat treatment and coating processes are excluded and accident risks are minimized by implementing security measures during the production and storage activities.

The only danger outside may be higher concentration of HCl caused by the possible leakage from a broken tanker hose when pumping the HCl from a tanker into the storage place, which may cause respiratory and eye irritations. Concentration in the air is dispersed within maximum 30 minutes.

Only **major event** what could possibly take place in AS Norma is **fire**, the main cause could only be disregarding the fire safety. AS Norma buildings are equipped with automatic fire alarms and extinguishers. Also there are 3 hydrants place to the territory.

High temperature, smoke, gases and combustion products are the main danger in the case of fire. Gas leak from the gas appliance (propane cylinder) outside of the building and explosion of a gas cloud is possible if the cylinders are on fire at least 10 minutes in case of a fire in building B3. The danger zone is 56 m.

According to the company's emergency response plan the persons remaining in the danger zone are immediately notified of the accident and cooperation with rescue authorities is performed to ensure the necessary actions.

In case of accident you must follow all the guidelines from the emergency services.

Additional information about safety precautions can be obtained from the security guards desk from the 2-nd entrance, phone 6500214.
